SUMMARY

Google Cloud Certified Professional Cloud Architect and HashiCorp Certified Terraform Associate with hands-on experience designing Google Cloud infrastructure, implementing Terraform-based Infrastructure as Code (IaC), and building keyless CI/CD pipelines. Software engineering background spanning backend development, cloud operations, Kubernetes administration, and Site Reliability Engineering (SRE) practices.

CERTIFICATIONS & SKILLS

Certifications

- CNCF Certified - [Certified Kubernetes Administrator](#)
- Google Cloud Certified - [Professional Cloud Architect](#)
- HashiCorp Certified - [Terraform Associate \(004\)](#)
- Google Cloud Certified – [Associate Cloud Engineer](#)
- AWS Academy Graduate – [Cloud Foundations](#)

Skills

- **Cloud Infrastructure:** Google Cloud Platform (Compute Engine, Cloud Run, VPC, Managed Instance Groups, Cloud NAT, HTTP Load Balancing, Secret Manager, Cloud Monitoring).
- **DevOps & IaC:** Terraform, remote GCS state, drift detection, GitHub Actions, GitLab CI/CD, Workload Identity Federation (WIF), Docker.
- **Kubernetes & Linux:** Kubernetes administration and troubleshooting (kubectl, kubeadm, workloads, Services, RBAC, networking, storage), Helm, Kustomize, Linux.
- **Software Engineering:** Node.js, Express, Prisma, REST API design, React, PostgreSQL, MySQL, MongoDB, JavaScript.

TECHNICAL PORTFOLIO & ARCHITECTURE

Published architecture write-ups on Dev.to covering reproducible Google Cloud infrastructure and secure delivery patterns:

- [GCP Terraform Foundation](#): Engineered reusable VPC modules, automated firewall provisioning, and remote GCS state management with object versioning.
- [Keyless CI/CD on GCP](#): Designed GitHub Actions pipelines using Workload Identity Federation for static-key-free deployments, approval controls, and automated drift detection.
- [Production-Lite GCP Web Platform](#): Designed a highly available web platform pattern using private backends, Managed Instance Groups, Cloud NAT, health checks, and external HTTP Load Balancing.

PROFESSIONAL EXPERIENCES

Application Engineer September 2025 - Present | Jakarta

PointStar PTE LTD

- **Cloud Infrastructure:** Designed and deployed Google Cloud infrastructure using VPCs, Managed Instance Groups, Cloud NAT, HTTP Load Balancing, Cloud Run, and Docker.
- **DevOps & IaC:** Built keyless CI/CD pipelines with GitHub Actions and Workload Identity Federation, and managed Terraform using modular configurations, remote GCS state, and drift detection.
- **Cloud Operations:** Supported production workloads through monitoring, logging, troubleshooting, performance analysis, and deployment operations.
- **Software Engineering:** Built backend services and REST APIs for workflow automation, Google Workspace provisioning, and AI-enabled applications.

Selected Projects: Sattabi (IoT door access platform), Glinsta (Google Workspace automation), Warehouse Management System, Travel Agent AI.

Oracle NetSuite Technical Consultant April 2024 – September 2025 | Jakarta

Hand Global Solutions

- **Technical Consulting:** Translated complex business requirements into technical solutions using SuiteScript and SuiteFlow, bridging functional requirements with engineering implementation.
- **ERP Customization:** Developed and customized NetSuite modules to improve operational workflows and support client-specific business processes.

- **Document Automation & Support:** Implemented custom PDF/Excel renderers using XML templates and supported functional teams through troubleshooting, knowledge transfer, and feature delivery.

VB.NET Developer November 2023 – April 2024 | Jakarta

Indomaret Group

- **Application Development:** Built and maintained VB.NET applications backed by MySQL databases for internal business processes.
- **Cross-functional Delivery:** Collaborated with support teams and business divisions to translate requirements into software enhancements and production fixes.
- **Front-end Modernization:** Introduced React wrapped in Electron.js to modernize front-end workflows within an existing application environment.
- **Reliability:** Reduced defects in the RRAK project, improving overall application stability.

Software Engineer Intern November 2022 – November 2023 | Cikarang

PT Mattel Indonesia

- **Full-Stack Development:** Engineered internal web applications for security and facility management using ASP.NET MVC.
- **Legacy Application Support:** Maintained and optimized 11 internal applications across ASP.NET, VB.NET, Power Automate, and Power Apps.

EDUCATION

Bachelor of Science in Information Technology August 2020 – December 2023 | Cikarang

President University

- **Honors:** Graduated Magna Cum Laude (GPA: 3.95).
- **Awards:** President University Scholarship Awardee (Academic & Leadership Excellence).
- **Thesis:** "Real-Time Skin Lesion Classification with Deep Learning Integrated into Android Application" (Grade: A).

Mobile Development Cohort 2022

Bangkit Academy

- **Honors:** Graduated with Distinction (Score: 98.5).
- **Capstone:** Co-developed an AI-driven plant disease detection application utilizing Kotlin, TensorFlow Lite, and GCP backend services. Selected among the top 15 teams out of 433.
