SUMMARY

Google Cloud Certified Professional Cloud Architect and HashiCorp Certified Terraform Associate with hands-on experience designing Google Cloud infrastructure, implementing Terraform-based Infrastructure as Code (IaC), and building keyless CI/CD pipelines. Software engineering background spanning backend development, cloud operations, Kubernetes administration, and Site Reliability Engineering (SRE) practices.

CERTIFICATIONS & SKILLS

- Professional Cloud Architect — Google Cloud
- Certified Kubernetes Administrator — Linux Foundation / CNCF
- Terraform Associate (004) — HashiCorp
- Associate Cloud Engineer — Google Cloud
- AWS Academy Cloud Foundations — AWS Academy Graduate

Cloud Infrastructure: Google Cloud, Compute Engine, Cloud Run, VPC, MIG, Cloud NAT, HTTP Load Balancing, Secret Manager, Cloud Monitoring.

Platform & DevOps: Terraform, GitHub Actions, GitLab CI/CD, WIF, Docker, Remote State, Drift Detection.

Kubernetes & Linux: Kubernetes, kubectl, kubeadm, RBAC, Services, Networking, Storage, Helm, Kustomize, Linux.

Software Engineering: Node.js, Express, Prisma, REST APIs, React, PostgreSQL, MySQL, MongoDB, JavaScript.

TECHNICAL PORTFOLIO & ARCHITECTURE

GCP Terraform Foundation: A reusable Google Cloud infrastructure foundation designed around modular networking, controlled firewall provisioning, and versioned remote Terraform state.

Keyless CI/CD on Google Cloud: A GitHub Actions delivery workflow using Workload Identity Federation to replace static cloud credentials with short-lived access.

Production-Lite GCP Web Platform: A Google Cloud web platform pattern combining private compute, a managed instance group, health checks, Cloud NAT, and external load balancing.

PROFESSIONAL EXPERIENCE

Application Engineer — PointStar PTE LTD

Sep 2025 — Present · Jakarta

- Designed and deployed Google Cloud infrastructure using VPCs, Managed Instance Groups, Cloud NAT, HTTP Load Balancing, Cloud Run, and Docker.
- Built keyless CI/CD pipelines with GitHub Actions and Workload Identity Federation, and managed Terraform using modular configurations, remote GCS state, and drift detection.
- Supported production workloads through monitoring, logging, troubleshooting, performance analysis, and deployment operations.
- Built backend services and REST APIs for workflow automation, Google Workspace provisioning, and AI-enabled applications.

Oracle NetSuite Technical Consultant — Hand Global Solutions

Apr 2024 — Sep 2025 · Jakarta

- Translated business requirements into technical solutions using SuiteScript and SuiteFlow.
- Customized NetSuite modules and automated PDF/Excel outputs with XML templates.
- Supported functional teams through troubleshooting, knowledge transfer, and feature delivery.

VB.NET Developer — Indomaret Group

Nov 2023 — Apr 2024 · Jakarta

- Built and maintained VB.NET applications backed by MySQL.
- Delivered software enhancements and production fixes.
- Introduced React wrapped in Electron.js to modernize front-end workflows.
- Reduced defects in the RRAK project and improved application stability.

Software Engineer Intern — PT Mattel Indonesia

Nov 2022 — Nov 2023 · Cikarang

- Built internal ASP.NET MVC applications for security/facility workflows.
- Maintained and optimized 11 internal applications across ASP.NET, VB.NET, Power Automate, and Power Apps.

EDUCATION

President University

B.Sc. Information Technology · August 2020–December 2023 · Cikarang

- Magna Cum Laude · GPA 3.95.
- President University Scholarship Awardee — Academic & Leadership Excellence.
- Thesis: Real-Time Skin Lesion Classification with Deep Learning Integrated into Android Application (Grade A).

Bangkit Academy

Mobile Development Cohort · 2022

- Graduated with Distinction — 98.5.
- Co-developed an AI-driven plant disease detection application using Kotlin, TensorFlow Lite, and GCP backend services; top 15 of 433 capstone teams.
